Notes

- 1 MCE Small Area Plan (Page 72): "Sensitivity to lower density buildings to the north and south suggests that the redevelopment's massing should step down toward those existing buildings."
- 2 MCE Small Area Plan (Page 73): "Reflect the height and scale of existing neighborhood developments, including the recently constructed SeVerna. Development on the Sursum Corda site should step down towards First Street NW and towards the Mt. Airy Baptist Church, and step up towards North Capitol Street NW."
- 3 For purposes of counting FAR, Gross Floor Area does not include: 1) parking and access ramps, 2) bays projecting 4' -0" or less over area lines, and 3) spaces with structural headroom clearance less than 4'-0" above grade level.
- 4 Includes 199 affordable within the project at varying levels and types of subsidies.
- 5 The number of dwelling units will be determined with future second stage submission. The unit count will vary depending on building efficiency and market conditions. The number of units shown for the purpose of these tabulations is illustrative of what might be achieved.
- 6 Parking #'s will be revised in future second stage submission application to correctly reflect the number of units and market conditions. The number of spaces shown provided for the purpose of these tabulations is illustrative of what might be achieved.
