Re: Windows for:

J C Development

1514 "Q" Street

Washington N.W., DC

Board of Zoning Adjustments:

I, Pat Garvey, with Lamar and Wallace Millwork Inc., was contracted by the developer at 1514 Q Street NW where I took field dimensions of all windows for the replacement of all front façade historic windows on all levels including the cellar level. At the time of the field visit, all of the historical windows were existing in place where I measured each and every window and replaced the historical windows with a new wood window all of which were to the exact dimensions of the old historical windows.
