

**Jeff Barber, AIA, LEED AP**  
Principal and Firmwide Design Experience Leader

**Lead Project Designer**

Jeff’s design talent is combined with a unique understanding of the process of design and the teamwork required to implement complex programs in simple, yet elegant, solutions.

Jeff is an award-winning architect and serves as a Firmwide Design Experience Leader with a deep background in Gensler’s global Commercial Office Building practice. He also acted as DC’s Co-Managing Principal for many years and brings this organizational experience to his client relationships and projects. He often leads large integrated projects, providing expertise on the design of the base building as well as the interiors. Throughout all of his work, Jeff’s point of view bridges the shared interest of both building owner and user to create designs that successfully depict both parties’ objectives.

**32 Years of Experience**

Joined Gensler 1996

**Background**

Master of Architecture, Yale School of Architecture  
 Bachelor of Science, Yale University  
 Registered Architect: New York  
 Member, American Institute of Architects  
 Designated National Design Peer, U.S. General Services Administration Public Buildings Service, Design Excellence and the Arts Program  
 USGBC LEED®-Accredited Professional

**Robby Deem, LEED AP BD+C SENIOR ASSOCIATE**

Robby is an experienced acoustical consultant with extensive background in architectural engineering. His expertise expands upon a wide range of project types including healthcare, government facilities, hospitality, law firm interiors, museums, and broadcast studios. Each project type comes with aspects that require a high level of detail, specifically healthcare with regards to noise and vibration requirements for a successful facility. Robby is proficient at using acoustical modeling software and designing for the needs of the end user.

An active member of the Acoustical Society of America and the United States Green Building Council, Robby has recently given several presentations on what needs to be planned for to pursue the WELL Building Standard from an acoustics standpoint.

**Education**

Illinois Institute of Technology  
MASTER OF ARCHITECTURAL ENGINEERING
