

Neighbor's side wall

Applicant's house

Photo 1. View of side of applicant's house and neighbor's side wall, which has no windows facing proposed addition

Neighbor's house, with no windows facing applicant's house

Back of applicant's house with view of shared wall from street

Photo 2: Closer view of neighbor and back of applicant's house. Proposed bump out would bring the back of applicant's house to same back depth as neighbor's house (and next 3 neighbors in the same row).

Photo 3:  
View of  
neighbor's  
side wall,  
with no  
windows,  
from  
applicant's  
current deck.

Photo 4: The proposed addition would bring the back of applicant's house to same back depth as neighbor's house. No view or light of neighbor would be obstructed. This picture also shows bump outs of next neighbors' down.

Shared wall - the proposed addition will come to the edge of this wall.

5: Side view of house across street which has back bump out.

Photo 6: Back view of immediate neighbors bump outs. These bump outs extend out beyond what applicant's proposed bump out would be. Proposed bump out would bring applicant's back of house even with brick rear walls.
