

My name is William Henderson and I live at 17 Randolph Place, NW and I am writing to bring some concerns about case number 19887 regarding the expansion of Jam Doung restaurant:

The expanded patio space is a concern because this is already a high traffic sidewalk and I am concerned expanding the patio seating will cause undue inconvenience for many pedestrians that transverse down the north side of Randolph Place. In regards to the trash storage, this is a very high concern that with increased customers purchase it will increase the trash volume and ultimately infestation of rodents will increase. I am hoping that this issue will be addressed because we are currently having challenges with rodent abatement now. I do support the expansion of a sit down area on the second floor, I would welcome this service and hoping that carryout customers will utilize the second floor space instead of sitting in their vehicle and tossing their carryout containers out the window when they have finished eating their meals. The extend hours I support since other bars and restaurants have extended hours and I don't want to penalize Jam Doung this privilege that other establishments get to have.

Lastly, I would welcome if the Randolph Place traffic pattern could change to a "One Way" street heading in the direction of west, and we can get residential zoning parking specifically preventing visitors from parking on a specific side of the street it will only be for residents. Thank you for allowing me to voice my concerns.

Regards,

William Henderson
