Hi charles,

Thanks for sending this. As I mentioned by phone, I have no objections to your project.

Good luck with it and let me know if you need anything further.

All the best,

David Michael

David,

Good talking to you today. I appreciate your feedback and will focus on the issues you raised once we get a contractor. As promised, I have attached the plans for your review.

I appreciate you stating your support. I have been told that we will be asked if people around us support or oppose and asked for any written notes of support. It would be helpful for us to get an email from you (if you are willing) simply stating your support or non-opposition to the project that we could share if asked. We apparently have this from a Ellen, Peter, and Marci already.

Thank you for the discussion and your consideration.

Charles Cooper
