In re: BZA/HPRB Application for 751 10th Street SE (BZA Case #20615)

To Whom it May Concern:

Hello, my name is Georgia Weingarten, and I am a tenant of [REDACTED]. I have reviewed the drawings of the rear addition and carriage house at 751 10th Street SE and I strongly oppose the proposed project. I live in the basement apartment towards the rear of the building and will likely be the most affected by any construction plans on the neighboring property. My only true window that lets in unadulterated light and fresh air is in my bedroom. The proposed construction would block it off completely. My apartment already does not get much light, and this will put a very big damper on the atmosphere inside and have a negative effect on my mood. Natural light is what keeps humans connected to the world during long winters, especially in the COVID era. My cat spends almost her entire day on her cat tree by this window and I worry about what her days will be like if this source of light, warmth, and entertainment is taken away, too.

Thank you for listening to my concerns. I have lived in this apartment for 6 years, and I would hate for this to be the reason I would have to leave.

Sincerely,

Georgia Weingarten
