Re: Case No. 02-17C (PUD and Map Amendment @ Square 1663,  
Lot 805 and a Portion of Lot 7-5401 Western Avenue, NW)

Dear Commissioners:

Thank you for allowing me the opportunity to testify before the Zoning Commission on December 16 on behalf of the Chevy Chase Plaza Children's Center in the above referenced case. As you requested, the Children's Center is providing the attached supplemental submission to aid the Zoning Commission in your consideration of this PUD application.

A year and a half ago, the Chevy Chase Plaza Children's Center ("CCPCC") was asked by the Chair of ANC 3E to join a working group formed to participate in the development of the Washington Clinic site. The working group included representatives from Stonebridge Associates, members of the ANC 3E, several neighborhood residents (including representatives from the Courts of Chevy Chase), and CCPCC. It is my understanding that CCPCC was asked to participate in this original working group because of its long-standing involvement in the community, close proximity to the proposed development, and neighbor interest in including a playground for CCPCC (once promised as part of the development of Square 1661) in the plans for redevelopment of the Washington Clinic Site. Long before any discussion of potential space for a child care facility, CCPCC and many other residents of our community were excited about the opportunity to bring additional housing to the Friendship Heights neighborhood. We carefully considered height, density, environment, traffic, and public benefits and shared our concerns directly with Stonebridge Associates. In March, 2002, Stonebridge Associates presented to the community a plan for redeveloping the Washington Clinic site that incorporated comments they had received during the months of meetings and discussions with the working group. At that presentation, although many community members supported the project, it became apparent that some residents were not happy with what was proposed. For the next five months, the working group tried to respond to neighbor concerns to create an acceptable project.

ZONING COMMISSION  
District of Columbia  
Case 02-17  
Exhibit 211

5310 43RD STREET, NW  
WASHINGTON, DC 20015  
(202) 244-1402

One such adjustment came in regards to the initial plan to build a playground for CCPCC. Neighbors asked that, should a playground be included in the final PUD, the playground be open to the public. Unfortunately, despite efforts to grant the neighbors' request, insurance prohibitions and concerns for existing trees resulted in the elimination of this component in the project. Knowing of CCPCC's interest in expanding their services and unable to offer a playground on the site, Stonebridge Associates recommended the inclusion of expansion space for CCPCC in their supplemental PUD. This recommendation garnered full support from the ANC 3E, was received very favorably by the Office of Planning, and pleased an enormous number of local residents, particularly those struggling to find child care in the neighborhood.

CCPCC continued to participate objectively and constructively in the evolving plans to redevelop the Washington Clinic site. Upon receiving confirmation that a child care facility was in fact included in the supplemental submission filed by Stonebridge Associates on October 25, 2002, CCPCC applied for party status in the Zoning Commission proceeding. CCPCC had hoped that by obtaining party status, we could provide the Zoning Commission with in-depth, factual, and accurate expert testimony regarding the value of a child care component in the proposed PUD. CCPCC also felt an obligation to represent the hundreds of families who believe that increased child care within their neighborhood is an exceptional amenity and should weigh heavily in determining the overall value of the Stonebridge PUD.

We were looking forward to participating in an honest and careful assessment of the merits of the Stonebridge PUD application. We conducted analyses of traffic from our existing facility and extrapolated anticipated traffic burdens from that data to help the Zoning Commission confirm that a 44-child child care facility at the Washington Clinic site would not significantly impede traffic flow in the area. (See Attachment A) We studied current and historical data to confirm the demographic dynamics of our clientele so that the Zoning Commission would be reassured that a child care facility provided as an amenity to the community could in fact support the residents of that community directly. (Attachment B provides detailed demographics, including those requested by the Zoning Commission on December 16.) Moreover, the benefits that CCPCC has provided to this community consistent with the directive of Zoning Order 519 prove that the excessive restrictions proposed by FHord for the child care amenity are unnecessary in this context. Indeed, CCPCC's own internal policies work to ensure the goals and purposes set forth in Zoning Order 519. (See Attachment C)

Unfortunately, we were quite surprised and very disappointed to learn that FHord, instead of focusing its testimony on the merits of the Stonebridge PUD application, in its written and oral testimony on December 16, chose as their banner argument to make unsupported allegations and factual misrepresentations regarding CCPCC in an attempt to devalue the inclusion of a child care amenity in this project, and therefore distract attention from the true merits of the PUD application. As such, the FHord organization's testimony contains inaccuracies and contradictions. These are detailed in Attachment D, which sets forth in full FHord's testimony and CCPCC's corrections there to. FHord's testimony also relies (albeit inaccurately) on confidential documents obtained without consent from CCPCC, which we have requested be returned. Additionally, to protect the privacy of CCPCC's families and children, CCPCC is asking that any confidential data provided to the Zoning Commission regarding CCPCC families (i.e., the CCPCC Family & Staff Directory) be removed from the public record. To the extent that FHord has included in any submissions copies or excerpts from any internal, confidential CCPCC documents, such as the Family

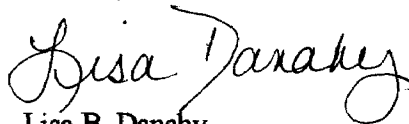

Directories, these documents should be returned to CCPCC. In lieu of such personal information, we are providing demographic statistics and data regarding the present and historical makeup of CCPCC families in a format that we understand is acceptable to FHord and meets the Zoning Commission's request. (See Attachment B)

In addition to the factual defects in the FHord testimony, further review reveals that the FHord organization does not represent the views of the Friendship Heights community as a whole, much less more than a small minority of our neighborhood. FHord, in their December 16 testimony, defines the neighborhood as those who reside in ANC3E04 or ANC 3E03. (See page 42 of FHord written testimony presented 12/16/02.) CCPCC respectfully disagrees with the margins defined by FHord as "the neighborhood." In fact, the Zoning Commission has considered testimony and awarded party status to the whole of ANC 3E, as well as ANC 3G, and, at a minimum, those residents should all be considered members of this "neighborhood." Limiting the child care amenity to the small group of residents proposed by FHord would undermine the inclusion of that amenity by denying child care services to legitimate members of the neighborhood. It would also make it virtually impossible for such a child care facility to sustain itself given the limited pool of potential enrollees in the "neighborhood" as defined by FHord. Moreover, it is curious that FHord claims to represent the entire community, but proposes to modify this amenity to benefit only a small circle of residents.

It seems that many of the conclusions FHord draws and recommendations FHord makes regarding the child care component within the Stonebridge PUD may not come from experience or expertise. Instead, the singling out of this portion of the application appears to be nothing more than a veiled attempt to distract the Zoning Commission from the many excellent benefits that the community stands to gain through approval of the redevelopment of the Washington Clinic site as proposed by Stonebridge Associates.

Thank you again for allowing me the opportunity to submit this additional information and to participate in this Zoning Commission proceeding. Should you have any additional questions or need further information, please do not hesitate to contact me at 202-244-1402.

Sincerely,

Lisa B. Danahy  
Executive Director

## TRAFFIC STUDY

November 5, 2002

The following statistics were gathered on a standard day of operation for the Chevy Chase Plaza Children's Center.\*

Weather Conditions: Overcast, Rainy

Time of Study: 7:30 a.m. to 10:00 a.m.  
Tuesday, November 5, 2002

<b>Total Number of Cars Dropping Off Children:</b>	<b>12</b>
Drop Off Vehicles by Address:	
ANC 3E, 3G/F: 6100 31 <sup>st</sup> Pl., 4800 41 <sup>st</sup> St., 4400 Faraday Pl., 5900 Nevada Ave., 6100 Western Ave., 3600 Jenifer St., 4500 Chesapeake St.	7
ANC 3B: 3800 Porter St.	1
Ward 4: 5500 29 <sup>th</sup> St.	1
Maryland: 20817, 20814, 20895	3

(Total Number of Children Arriving by Car: 14)

<b>Total Number of Children Dropping Off On Foot:</b>	<b>3</b>
"Walkers" by Address:	
ANC 3G: 2900 Northampton St.	1
Maryland: 20815, 20817	2

\* This was Election Day, which holds the potential for increased vehicular traffic due to parent plans to vote on the way to or from work, in addition to picking up or dropping off their children. However, this traffic data was collected without adjusting for any "unusual" car drop-offs that may have resulted from Election Day plans.

**ENROLLMENT POLICY EXCERPTS  
FROM THE FAMILY HANDBOOK FOR THE  
CHEVY CHASE PLAZA CHILDREN'S CENTER**

**NONDISCRIMINATION POLICY**

**Page 3**

Our Center maintains an equal opportunity child-care policy. Applications for enrollment are accepted without regard to race, religion, color, sex or national origin.

**ENROLLMENT**

**Page 7**

*Application Forms/Waitlist:*

An application form is to be completed by the child's parents. Families who submit the application form and payment of the appropriate fees will be placed on the Center's waitlist. At the time of submission, families will be told of the approximate waiting time until a space becomes available in the appropriate classroom. There is no guarantee that a space will become available at the time services are needed or when the space was anticipated to be available. Siblings of children currently enrolled in the Center are moved to the top of the waitlist, followed by children of Center employees. Preference may also be given to families who live and/or work in the ANC 3E neighborhood. Parents are encouraged to inform the Director of any changes in the status of their application or request for care.

When a space becomes available in a classroom, current part-time families seeking full-time care will be given the right of first refusal. If the space is still available, the Director will contact the next family on the waitlist to inform them of the opening. Families seeking full-time care will be given preference whether or not the available space is full-time or part-time. Consideration is also given to families who live in and/or work in ANC 3E.

*Preferential Placement*

**Page 10**

CCPCC will maintain, to the best of our abilities, a balance on our waitlist of neighborhood families and employees of neighborhood businesses. Preferential consideration will be given to placement of those families who live and work in the ANC 3E neighborhood.

**FINANCIAL ASSISTANCE PROGRAMS**

**Page 14**

*Sibling Discount*

A sibling discount is provided to families with more than one child enrolled in the Center. This discount is ten percent (10%) of the family's total monthly tuition bill for two children enrolled in the Center. A discount of fifteen percent (15%) of the family's total monthly tuition bill is offered to families with three or more children enrolled in the Center.

*Tuition Abatement*

In an effort to ensure that the child care needs of our community are met, CCPCC offers tuition assistance to families living in the ANC 3E neighborhood who are earning a combined income of less than \$40,000 per year. Please see the Director for more information regarding this program.

# ATTACHMENT D

**CLARIFICATION OF AND CORRECTION TO THE  
TESTIMONY PRESENTED BY THE  
FHORD ORGANIZATION TO THE ZONING COMMISSION  
ON DECEMBER 16, 2002**

Written testimony of FHord as presented on December 16, 2002, appears in italics, followed by clarifications/corrections (in bold).

*The day care proposal does not efficiently provide day care capacity and does not constitute a neighborhood amenity. Stonebridge proposes to provide new space rent-free for fifty years to an incumbent market-rate day care provider. (FHord Testimony, p. 38)*

- \* **CCPCC is licensed to care for 31 children. The proposed child care facility provides space for approximately 44 additional children, increasing CCPCC's capacity by over 150%, more than doubling the spaces available for neighborhood children. Based on the square footage proposed by the Stonebridge PUD, CCPCC, because of the existence and close proximity its current location, has the flexibility to provide the maximum number of child care spaces within this facility, optimizing the efficiency of the amenity.**
- \* **The Findings of Fact in Zoning Order No. 519 confirm that both the ANC 3E and ANC 3G consider "the child care center is an amenity" in the development proposed under that PUD. (See, ZC Order No. 519, Case No. 85-20C, page 10, paragraph 37.e. and page 11, paragraph 38.e.) Additionally, in that proceeding the Zoning Commission found "that the center is desirable, is needed in the area, will serve both the community and the proposed development and will not have an adverse impact on traffic." (See, ZC Order No. 519, Case No. 85-20C, page 15, paragraph 51.) The need for child care has not declined in intervening years; CCPCC's waitlist has almost 100 families. Therefore, FHord's claim that the "day care proposal...does not constitute a neighborhood amenity" is incorrect.**

*Provision of the day care amenity removes 15,000 SF of R-2 land from possible future development. (FHord Testimony, p. 38)*

- \* **Stonebridge Associates negotiated the purchase of a portion of Lot 7 from the Lisner Home prior to the inclusion of a child care amenity in its PUD. The 15,000 square feet of R-2 land was not added in order to provide the child care amenity.**

*The day care proposal does not constitute a neighborhood amenity: There is no assurance that the capacity will be used by the neighborhood children (FHord Testimony, p. 38)*

- \* **CCPCC began operation in 1989, in accordance with Zoning Order No. 519, as a small non-profit corporation licensed to provide child care for 31 children whose families live or work in the Friendship Heights community. As the demographic data provided herein as Attachment B demonstrate, CCPCC's operations have been and continue to be consistent with the parameters of Zoning Order No. 519. Indeed, our current enrollment from the Friendship Heights neighborhood exceeds the goal set forth in the Order. Because enrollment can fluctuate, CCPCC would recommend language similar to that found in Zoning Order No. 519 to address any concern about the child care facility providing services to children who live in the neighborhood and ensure that the child care component remains a viable amenity in future years.**

*There is no provision for pass-through of economic benefit. (FHord Testimony, p. 38)*

- \* **As demonstrated in the statistics below, the economic benefit to this community of more child care spaces is obvious. Moreover, by nature, a non-profit organization is established to return benefits directly to its customers through the reinvestment of any financial return into the organization. For example, CCPCC is able to provide sibling discounts, tuition assistance, and employee discounts, while maintaining below, or at-market, tuition rates for its students. Requiring non-profit status of the child care facility within the Stonebridge PUD may address any neighborhood concern regarding economic return to the neighborhood.**

*Further, the Ward 3 Plan, Land Use Element, only calls for an increase in child care facilities in commercial areas. (Section 1409.2) (FHord Testimony, p. 38)*

- \* **According to Child Care Profiles, a statistical analysis prepared by the University of the District of Columbia, Center for Applied Research and Urban Policy, and distributed by the DC Office of Early Childhood Development, Department of Human Services (which was provided with CCPCC's original testimony on December 16, 2002) , almost 700 children living in Ward 3 are on waiting lists for child care. Of those 700, five hundred and ninety (or 86%) are under the age of four. There is, without question, a demonstrated need for quality child care in the District of Columbia, including Ward 3. Taking such a technical view of the Ward 3 Plan, Land Use Element, neglects the purpose and spirit of the goal of increasing child care facilities in Ward 3.**
- \* **Moreover, Stonebridge has proposed the location of the child care space along Western Avenue, with a large surrounding area of commercial and residential properties. The Office of Planning has defined this area as a "regional retail center." As such the entire neighborhood, besides being a mix of residential and retail property, has commercial aspects, and including a child care center in such an area through this development seems consistent with the Ward 3 Plan.**

*Section 200.14 Affordable, quality child care is an essential precondition for parents with children under the age of fifteen (15) to enable them to work, seek employment, complete school, and participate in job training programs. (FHord Testimony, p. 39)*

- \* **Throughout its operations, CCPCC has made diligent efforts to expand our program, including offering financial assistance through needs-based tuition assistance, tuition reduction for sibling enrollment, and discounted care for children of our teachers. Moreover, during the past 10 years, countless children have been educated at CCPCC and have successfully attended local public and private elementary schools throughout the area. Those public and private elementary schools recognize the talent developed through our program and appreciate our dedication to early childhood education. The reputation that CCPCC has for providing affordable, quality child care in this community is evident in the almost 100 children currently on the waitlist for enrollment into our program. CCPCC appreciates that affordable care is important and seeks to provide that care in accordance with its non-profit status. However, CCPCC also recognizes that the most valuable benefit of child care lies in the quality of the education provided, and that our children receive.**

*Section 300.7 Zoning and health-care regulations should be designed to promote an increase in affordable child care programs and facilities. (FHord Testimony, p. 39)*

- \* **Despite the restrictions placed on CCPCC by the licensed size of its enrollment, we understand that our rates have consistently been maintained at, or below market-level. Consistently high enrollment, along with our extensive waitlist, confirm that the services provided by CCPCC appear to be well-within the parameters of "affordable" for families living in this neighborhood.**

*CCPCC is currently obligated to use 16 slots of its 32 slots for the local neighborhood. It has not filled those slots from the neighborhood. In 2000-2001, 4 FTEs were from the neighborhood, 11 children resided in ZIP code 20015. [Source: CCPCC Directory of Children/Parents] (FHord Testimony, p. 40)*

- \* **First, CCPCC is licensed to provide child care for 31 children, not 32 children. Additionally, Zoning Order No. 519 does not require a designated number of spaces be "filled from the neighborhood." Rather, the order provides:**  
*the child care facility shall be organized as a non-profit organization... operated so that enrollment is open to children of employees of the projects in Square 1661 and to children of community residents on an equal basis with the goal of achieving a 50-50 ratio between the two groups. If the child care facility must make an organizational or other change to maintain its non-profit status, the child care facility will continue to promote the 50-50 mix between neighborhood children and children of employees of the projects with the goal of ensuring that neighborhood children participate in the child care facility on an equal or preferred basis with children of employees." (See Zoning Order No. 519, Case No. 85-20C, page 20, paragraph 13.)*  
**CCPCC continues to promote the mix contemplated by the Zoning Order, with the goal of achieving enrollment of a greater number of neighborhood children. CCPCC's current enrollment – with just over 60% of its children residing in ANC 3E or ANC 3G – exceeds the mix contemplated by the Zoning Order (See Attachment B.)**
- \* **In deriving these figures, it appears that FHord has utilized a more restrictive definition of "neighborhood" than was intended in Zoning Order No. 519. ANC 3E and ANC 3G, along with the Citizens Coordinating Committee for Friendship Heights and the Friendship Neighborhood Coalition, were all granted party status in the proceeding resulting in Zoning Order No. 519. Those groups represented a larger portion of citizens within the Friendship Heights Community than that contemplated by FHord's definition of neighborhood. As such, the relevant neighborhoods for consideration of what CCPCC currently offers to the "neighborhood" is substantially larger than that used by FHord. In this proceeding, the Zoning Commission has likewise granted party status to ANC 3E and ANC 3G. As a result, it seems that "neighborhood" for this proceeding should, at a minimum, include residents of ANC 3E, residents of ANC 3G, and possibly other residents of Ward 3. Neither the traffic counts that**

**CCPCC has provided, nor the parties at interest in this case and the actual make-up of the community at large, support the limited definition of neighborhood, i.e., within "walking distance", as relied on by FHord. Using such a limited definition fails to consider a number of residents who do, in fact, belong to this community and have need for affordable, quality child care.**

*This proposal would increase to 60 the number of CCPCC slots for the community. (FHord Testimony, p. 40)*

- \* **Should CCPCC be provided the opportunity to manage the child care space proposed by Stonebridge, the potential spaces available for neighborhood children would be approximately 75 (31 from the existing location and 44 at the new facility).**

*In 2000, there were a total of 244 children under the age of 6 in Census Tract 11, and of those 118 children had no parents outside the labor force. (FHord Testimony, p. 40)*

- \* **It is unclear to what region FHord refers when quoting the Census data. Therefore, for clarification, CCPCC submits that *Child Care Profiles* (a statistical analysis prepared by the UDC Center for Applied Research and Urban Policy, and published in November, 2002, by the DC Office of Early Childhood Development, Department of Human Services) reports that in Census 2000 the population for Ward 3 included 1,731 children under the age of two and 962 children between the ages of three through 4, with an estimated number of children between the ages of 0 and 5 years, with all working parents, to be 2,029. There are less than 689 available child care spaces for those children.**

*Day Care Amenity: General Principles – local parents should face a choice of day care providers, the day care center should serve the local community, the day care amenity should be efficiently provided, conditions to assure that the center meets these goals should be included in the PUD. (FHord Testimony, p. 41)*

- \* **CCPCC has a long-standing history of involvement in the community and a reputation for providing affordable, quality child care within the neighborhood. Additionally, for the past three years, CCPCC has actively searched for affordable space in an effort to expand the services it provides to the community. Members of ANC 3E have been keenly aware of CCPCC's desire to provide additional child care locally and recommended CCPCC as the proposed manager for the child care site in the Stonebridge PUD because of its reputation for excellence within the community. Unfortunately, availability and affordability of appropriate real estate for a child care facility make locating these types of additional services within Ward 3 very unlikely. CCPCC is part of only 21% of the child care centers surveyed by the UDC Center for Applied Research and Urban Policy (See *Child Care Profiles*) that expressed a willingness**

**to expand their services to care for additional children. Additionally, CCPCC is familiar with the needs of the community, has a tradition of serving the local population, and currently operates as an amenity within a PUD less than one block from the proposed Stonebridge PUD.**

*Efficiently Providing a Day Care Amenity: the day care space shall be rented only to a day care provider and a minimum capacity is included in the PUD; 80% of the children will reside in ANC3E04 or ANC 3E03; incumbent neighborhood day care providers will not be eligible; if the day care center fails to operate or ceases to operate, the space will revert to residential use and the developer will make a contribution for an equivalent neighborhood amenity; the PUD should include a reporting requirement to assure compliance with the above conditions. (FHord Testimony, p. 42)*

- \* **CCPCC is a child care facility licensed to operate in the District of Columbia. Based on its pre-existence in the community and the fact that it is already licensed, Stonebridge Associates has recommended CCPCC as the operator of the child care facility proposed within its PUD. Throughout this proceeding, the Zoning Commission has recognized both the ANC 3E and ANC 3G as interested parties in this development. At a minimum, these two ANCs represent the neighborhood, if not all of Ward 3. It is not in the best interest of the District of Columbia, the Zoning Commission, or the residents of this community to limit so drastically the service area for the child care facility, and in fact, a child care facility limited to such a small service area would not likely be able to sustain itself.**
- \* **Because a major concern of FHord is that services be provided to children who live in the community, it is unclear why FHord would chose to deny the opportunity for management of a new facility to incumbent neighborhood child care providers, who are clearly most familiar with the immediate community and its needs. An arbitrary restriction on the eligibility of any particular provider (much less one recommended by the community and the developer) makes no sense. Certainly, the intent of including a child care amenity within the Stonebridge PUD is to provide a continuing benefit to the community.**
- \* **Should the child care facility cease to operate, CCPCC recommends that the Zoning Commission employ language similar to that found in Zoning Order No. 519, allowing for the reversion of the child care space to residential use. Special reporting requirements seem unnecessary in light of the ample oversight of the enforcement branch of the Office of Zoning.**

*Claimed public benefits have minimal value: Chevy Chase Plaza Children's Center: Actual public benefit as proposed: very minimal. Comp. Plan stresses affordable child care. (FHord Testimony, p. 63)*

- \* **CCPCC currently provides affordable child care, as demonstrated by market rates and enrollment statistics provided above. CCPCC would continue that practice within the operation of a second location, within the Stonebridge PUD or at any location. Certainly the inclusion of a space rent-free, as provided for in the current proposal, will facilitate the provision of more affordable child care in the community, which is a very substantial public benefit.**

*Section 300.7. Zoning and health-care regulations should be designed to promote an increase in affordable child care programs and facilities. (FHord Testimony, p. 63)*

- \* **Stonebridge Associates has proposed CCPCC as the operator of the proposed child care facility because it has, for the past 13 years, provided affordable, quality child care within the Friendship Heights community and plans to continue to meet the needs of the community, regardless of the inclusion of a child care facility within the Stonebridge PUD.**

*No assurance of any neighborhood benefit – either spaces reserved for neighborhood children or pass-through of economic benefit. (FHord Testimony, p. 63)*

- \* **In order to ensure a neighborhood benefit, and allow for pass-through of economic benefit, Stonebridge Associates and the Zoning Commission need do nothing more than model the proposed child care facility after the center currently operated by CCPCC.**

*Benefit inefficiently provided, cost to Applicant does not equal benefit. Also, cost of lost housing opportunity. (FHord Testimony, p. 64)*

- \* **While CCPCC is sure that Stonebridge appreciates FHord's suggestions on reducing the cost for Stonebridge to provide the child care facility, the fact that Stonebridge is willing to sacrifice so generously for the benefit of the community in providing the child care space on the terms proposed indicates what a substantial public amenity it is. In addition, the child care facility is proposed as a separate building outside of the residential component of the Stonebridge PUD, which appears to eliminate any concern about lost housing opportunity.**

*Serious child safety issues will be created due to dual use loading dock/parking lot.  
(FHord Testimony, p. 64)*

- \* **The drawings presented by Stonebridge show the proposed child care facility and accompanying parking lot as separate from the apartment building. While the parking lot appears to utilize the same curb cut as the loading area, the loading area and parking lot are not interconnected, as a private driveway leads to the parking lot for the child care facility. Additionally, the parking lot is separated from the garage entrance for the apartment building. It is a self-contained separate parking area.**

*Designated provider, CCPCC, is in continued and material breach of current PUD and should not be hand-picked as new provider. (FHord Testimony, p. 64)*

- \* **CCPCC was recommended and chosen as the potential operator of the child care component of the Stonebridge PUD based on its long-standing reputation for providing exceptional, affordable child care within ANC 3E. CCPCC has offered to operate the child care component of the Stonebridge PUD because of its desire to serve a greater number of children within the community. CCPCC was recommended by the ANC 3E, and is supported by the Office of Early Childhood Education, in its efforts to address the urgent child care crisis within the community.**
- \* **As discussed at length above, CCPCC believes that its operations have been and continue to be consistent with Zoning Order No. 519. Indeed, 60% of CCPCC's current enrollment comes from families living in ANC 3E and 3G, as we understand those boundaries to be. As such, FHord's unsubstantiated allegation of breach is mere rhetoric. CCPCC stands willing to discuss its operations with representatives of the Office of Zoning at any time. We feel that CCPCC stands as a model of what an amenity in a PUD application can be.**
