Subject: Re: 02-381

Besides quotidian transport over-load, consider

Lethal congestion: DHS has declared 'M' St SW DC least evacuable thoroughfare in the country [e.g., per radionuclides swept downwind of 1600 - Penn Ave NW].

Threats posed by

- Ruinous HVAC-flooding in event of Force-III blowing up Estuary at High-Tide
- Madrid Fault up-thrust compression-wave, per 1809-1812 CE
- Klages Effect [angst & depression triggered by crowd-pressure]
