Subject: RE: Zoning Case 02-38I

To Whom it May Concern:

I am a DC resident living at 434 O Street, SW.

The massive development taking place at the Yards and the Wharf — with more to come — has led to significant impacts on congestion, traffic flow, and safety in our community.

I want to formally request that a study be initiated immediately and a safety plan be developed, prior to granting any additional development, to ensure the safety of our residents.

From the perspective of someone who lives in the community, it appears that our streets have quickly become overloaded over the past 2 years. More development is coming. What is the plan to address the day-to-day quality of life needs of community members, much less safety concerns, such as expeditious travel of emergency vehicles?

I am available to provide further comments and explanations, as needed.

Thank you,
Robin Snyder
