

To: DC Zoning Commissioners
Re: Zoning Commission Case #13-14; McMillan Park PUD
Date: May 13, 2014

I am asking the Zoning Commission to.

PROTECT MCMILLAN PARK

Don't destroy the open air and grass parkland that currently serves us as a carbon sink, water filter, and an open air refuge that provides views unsurpassed in our City. The historic underground caverns can continue to be used for emergency water security purposes and flooding mitigation, as shown by DC Water and their adaptive re-use project underway right now. And, we cannot stand for the City's short-sighted desire to privatize this twenty-five acres of public land, our McMillan Park

The City's plans to pave over the parkland and tear out the underground vaulted caverns is.

a bad idea. It spits in the face
of a sustainable DC. It violates the
most basic environmental concerns
Such a large, open, green space
is too valuable to give away for
parking and profits to the greed
monger developers.

Thank you for your consideration of this very important public property
