

**MARKET AT O STREET**

800 P St NW, Washington DC 20001

Completed in early-summer 2017.

The Market at O Street used the brick proposed for the 1329 5th Street, NE project on a portion of the building and after nearly 2 years in place, the brick shows remarkably little discoloration or staining.

**THE BORO**

8301 Greensboro Dr, Tysons, VA 22102

Completed in mid-summer 2019.

The Boro used the brick proposed for the 1329 5th Street, NE project on a portion of the building and after a few months in place, the brick shows remarkably little discoloration or staining.

The proposed brick for 1329 5th Street, NE has been selected, in part, due to the tonal variation and mottled look it creates. It is this variation in tone and texture that will give the building a feeling of patina upon completion and help the brick from looking worn or weathered over time.
