To Whom it may concern,

I am in support of Case #14-18. I bought my house in July 2013 and have enjoyed living in the community but am in favor of community development especially if it will improve the safety of the community. I was actually burglarized in June 2014 and since then have been scared to sleep at night despite spending additional money to add security features to my house. In addition, due to the surrounding community there are several nights where I am awoken by domestic violence incidents and police activity. In addition, I love to jog outside and when I go for a jog early in the morning some areas are not well lit and although I am relatively comfortable jogging in some parts of my neighborhood I am still not a hundred percent comfortable. Hence, I jog with a mace in my hand and find myself being hyper vigilant of my surroundings. By improving the community and developing the surrounding area my hope is that I will feel an increased sense of safety and community and will feel more comfortable living in my own house.
