**Subject:** RE: Park Morton - alley closing along Bruce Monroe

Hi Murphy,

DDOT does not support putting a barrier between the new private alley segment and the public alley. There's an opportunity to improve connectivity in the alley system and we don't want to pass up on that. The alley connection will facilitate alley operations for the structures that use the existing dead-end alley. We don't expect the connection would induce significant numbers of new trips to use the alley – non-local traffic would be expected to use the streets not the alleys.

-Jonathan
