To Zoning Commission:

Please do all you can to protect investments in solar energy and architectural elements in areas zoned RF-1. I urge you to oppose loosening the standards and allowing new construction or renovations to interfere with the energy producing capacity of solar units. I also urge you to oppose changes that would fail to protect the architectural elements of existing buildings. Current zoning was enacted to preserve the architectural designs and preserve the features of existing buildings. As a resident of an area zoned RF-1 who fought for these protections, I know the community will be deeply concerned if standards are weakened.

Thank you for your assistance.

Doug Tanner
