

I understand that Good Hope Road LLC intends to develop the lot at 1603 Good Hope Road, SE. The proposed development addresses the inefficiencies of low-density buildings along this property's stretch of Good Hope Road and avoids a poorly developed property that is inadequate for the needs of our neighborhood. The proposed scale of development will also fit into the character of the Anacostia Historic District. The fact that this site is underdeveloped with an outdated, non-historic building and adjacent to vacant lots leads to opportunities from both economic development and Historic District perspectives.

This intersection and the business that previously occupied the building located at 1603 Good Hope Road has been frequented by crime and violence. On 4/13/20, the Office of the Attorney General (OAG) filed a Complaint for violations of the Drug, Firearm, or Prostitution-Related Nuisance Abatement Act. It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial and residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

It is my understanding that Civic Suds will be a tenant in the new development, providing social support services such as literacy and educational programs, vocational training, health and wellness and housing support. I value the contributions of Civic Suds and believe their proposed programming is vital to the well-being of our community.

I ask that the Historic Preservation Review Board, the Historic Preservation Office and the Zoning Commission approve the proposed development plans, density and height of up to 75 feet, including a Zoning Map to attain such a building envelope. The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.

I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

It is my understanding that Civic Suds will be a tenant in the new development, providing social support services such as literacy and educational programs, vocational training, health and wellness and housing support. I value the contributions of Civic Suds and believe their proposed programming is vital to the well-being of our community.

I ask that the Historic Preservation Review Board, the Historic Preservation Office and the Zoning Commission approve the proposed development plans, density and height of up to 75 feet, including a Zoning Map to attain such a building envelope. The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.

I understand that Good Hope Road LLC intends to develop the lot at 1603 Good Hope Road, SE. The proposed development addresses the inefficiencies of low-density buildings along this property's stretch of Good Hope Road and avoids a poorly developed property that is inadequate for the needs of our neighborhood. The proposed scale of development will also fit into the character of the Anacostia Historic District. The fact that this site is underdeveloped with an outdated, non-historic building and adjacent to vacant lots leads to opportunities from both economic development and Historic District perspectives.

This intersection and the business that previously occupied the building located at 1603 Good Hope Road has been frequented by crime and violence. On 4/13/20, the Office of the Attorney General (OAG) filed a Complaint for violations of the Drug, Firearm, or Prostitution-Related Nuisance Abatement Act. It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial and residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

I understand that Good Hope Road LLC intends to develop the lot at 1603 Good Hope Road, SE. The proposed development addresses the inefficiencies of low-density buildings along this property's stretch of Good Hope Road and avoids a poorly developed property that is inadequate for the needs of our neighborhood. The proposed scale of development will also fit into the character of the Anacostia Historic District. The fact that this site is underdeveloped with an outdated, non-historic building and adjacent to vacant lots leads to opportunities from both economic development and Historic District perspectives.

This intersection and the business that previously occupied the building located at 1603 Good Hope Road has been frequented by crime and violence. On 4/13/20, the Office of the Attorney General (OAG) filed a Complaint for violations of the Drug, Firearm, or Prostitution-Related Nuisance Abatement Act. It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial and residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

It is my understanding that Civic Suds will be a tenant in the new development, providing social support services such as literacy and educational programs, vocational training, health and wellness and housing support. I value the contributions of Civic Suds and believe their proposed programming is vital to the well-being of our community.

I ask that the Historic Preservation Review Board, the Historic Preservation Office and the Zoning Commission approve the proposed development plans, density and height of up to 75 feet, including a Zoning Map to attain such a building envelope. The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.

It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial and residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

It is my understanding that Civic Suds will be a tenant in the new development, providing social support services such as literacy and educational programs, vocational training, health and wellness and housing support. I value the contributions of Civic Suds and believe their proposed programming is vital to the well-being of our community.

I ask that the Historic Preservation Review Board, the Historic Preservation Office and the Zoning Commission approve the proposed development plans, density and height of up to 75 feet, including a Zoning Map to attain such a building envelope. The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.

I understand that Good Hope Road LLC intends to develop the lot at 1603 Good Hope Road, SE. The proposed development addresses the inefficiencies of low-density buildings along this property's stretch of Good Hope Road and avoids a poorly developed property that is inadequate for the needs of our neighborhood. The proposed scale of development will also fit into the character of the Anacostia Historic District. The fact that this site is underdeveloped with an outdated, non-historic building and adjacent to vacant lots leads to opportunities from both economic development and Historic District perspectives.

This intersection and the business that previously occupied the building located at 1603 Good Hope Road has been frequented by crime and violence. On 4/13/20, the Office of the Attorney General (OAG) filed a Complaint for violations of the Drug, Firearm, or Prostitution-Related Nuisance Abatement Act. It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial and residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed use corridor that serves everyone in historic Anacostia. I understand that Good Hope Road LLC intends to develop the lot at 1603 Good Hope Road, SE. The proposed development addresses the inefficiencies of low-density buildings along this property's stretch of Good Hope Road and avoids a poorly developed property that is inadequate for the needs of our neighborhood. The proposed scale of development will also fit into the character of the Anacostia Historic District. The fact that this site is underdeveloped with an outdated, non-historic building and adjacent to vacant lots leads to opportunities from both economic development and Historic District perspectives.

This intersection and the business that previously occupied the building located at 1603 Good Hope Road has been frequented by crime and violence. On 4/13/20, the Office of the Attorney General (OAG) filed a Complaint for violations of the Drug, Firearm, or Prostitution-Related Nuisance Abatement Act. It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial + residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed-use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

It is my understanding that Civic Suds will be a tenant in the new development, providing social support services such as literacy and educational programs, vocational training, health and wellness and housing support. I value the contributions of Civic Suds and believe their proposed programming is vital to the well-being of our community.

I ask that the Historic Preservation Review Board, the Historic Preservation Office, and the Zoning Commission approve the proposed development plans, density, and height of up to 75 feet, including a Zoning Map to attain such a building envelope. The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space, and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.

The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space, and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.

I understand that Good Hope Road LLC intends to develop the lot at 1603 Good Hope Road, SE. The proposed development addresses the inefficiencies of low-density buildings along this property's stretch of Good Hope Road and avoids a poorly developed property that is inadequate for the needs of our neighborhood. The proposed scale of development will also fit into the character of the Anacostia Historic District. The fact that this site is underdeveloped with an outdated, non-historic building and adjacent to vacant lots leads to opportunities from both economic development and Historic District perspectives.

This intersection and the business that previously occupied the building located at 1603 Good Hope Road has been frequented by crime and violence. On 4/13/20, the Office of the Attorney General (OAG) filed a Complaint for violations of the Drug, Firearm, or Prostitution-Related Nuisance Abatement Act. It's important to me and to my neighbors that this property is developed to its full potential so we avoid another vacant or underutilized property.

The Ward 8 community needs a thriving Good Hope Road and Good Hope Road needs more commercial + residential density to thrive. I welcome the proposed development at 1603 Good Hope Road in the hopes that Good Hope Road becomes an even more vibrant mixed-use corridor that serves everyone in historic Anacostia. The lack of historic context on this property and on its specific block allows for a more meaningful new development in our community.

It is my understanding that Civic Suds will be a tenant in the new development, providing social support services such as literacy and educational programs, vocational training, health and wellness and housing support. I value the contributions of Civic Suds and believe their proposed programming is vital to the well-being of our community.

I ask that the Historic Preservation Review Board, the Historic Preservation Office, and the Zoning Commission approve the proposed development plans, density, and height of up to 75 feet, including a Zoning Map to attain such a building envelope. The development concept is compatible with the Anacostia Historic District, consistent with the D.C. Comprehensive Plan and Anacostia will benefit from the additional housing, commercial space, and non-profit services that are needed now more than ever. I appreciate the opportunity to extend my support for the development plans and the necessary entitlement applications to achieve them.
